

CathGrip provides universal securement for catheters from 2-47 Fr. With a gentle, skin-friendly hydrocolloid base, CathGrip can help eliminate skin tears, and moves with the body for improved skin outcomes and comfortable patients.

UniGrip™

UniGrip is a truly universal system that securely holds tubes from 2-47 Fr. Available in single or dual straps for all over securement with a skin friendly hydrocolloid adhesive to prevent skin injuries.

Soft straps with no-slip grip, will work for both adult and pediatrics. Gentle grips are durable for repeat positioning.

Available as sterile or non-sterile.

Grip & Seal™

Grip & Seal extends the security of our hydrocolloid base to support insertion site securement.

Hydrocolloid wings form an occlusive seal that securely holds any tube from 2-47 Fr and can help reduce dislodgement and infection rates. Wound dressing and catheter securement with a single device.

Only available as sterile.

HoldMe™

Designed to prevent pressure injuries and skin tearing with low-profile proprietary hydrocolloid securement. Especially important when dealing with tender skin seen in senior or pediatric populations.

Low profile oval pairs that are sized for difficult to apply areas. Will hold securely for up to 7 days.

Available as sterile or non-sterile.
