What We Do

Bioderm® specializes in the manufacture of innovative male external catheters, skin-friendly securement devices and the accompanying accessories. Our proprietary hydrocolloid and hydrocolloid base of products are hypoallergenic and don’t contain natural latex. When applied, it serves as a protective layer preventing irritation and trauma. Bioderm is committed to providing products that offer patients a superior experience centered around comfort, reliability and safety. Our products are cost effective, safer and life enhancing.

Compassionate Solutions

**UROLOGY**
Men’s Liberty™ and Safe n’ Dry® are revolutionary alternatives to diapers, condom catheters and medically unnecessary Foley catheters.

**SECUREMENT**
The CathGrip® family of universal catheter securement options provides clinicians with the ability to manage a wide variety of catheters and tubes ranging in size from 2-47 Fr.

**SKIN PROTECTION**
Ensure proper product application and removal with the use of BioPlus+™ Barrier Prep Wipes and FreeDerm™ Adhesive Remover.
Men’s Liberty

For Outpatient Use

Men’s Liberty is the innovative alternative to traditional male external catheters. It is completely external and applied just once a day. This discreet, one-size-fits-most option manages men’s urinary incontinence in a safe, healthy way. More than 3.5 million units have been used with zero attributable adverse events, including UTIs!

How Does It Work?

Men’s Liberty & Safe n’ Dry are made from hydrocolloid, a medical adhesive that creates a secure, skin friendly seal around the urinary opening. The Men’s Liberty is designed for use in the out-patient setting and includes an integral collection chamber that holds up to 8 fl. oz (250mL). When the urge hits, users can fill the collection chamber, which can then be discreetly emptied whenever they get the opportunity into a toilet through the stop valve located on the bottom of the product. It couldn’t be easier!

Features

- Has a completely external design
- Fits most male anatomy
- Keeps men dry and comfortable
- Average wear time of 24-48 hours
- 8oz urine collection pouch can be emptied easily throughout the day
- Replaces diapers, condom catheters and medically unnecessary Foley catheters

Safe n’ Dry

For Acute Care Use

Safe n’ Dry is a male external catheter designed for institutional and hospital use. It is completely external and seals gently and securely to the tip of the penis with BioDerm’s proprietary hydrocolloid adhesive XtraDerm™. Safe n’ Dry is currently private labeled in the US for Eloquest Healthcare® as ReliaFit®.

SKU# 23046
SKU# 21026
**Kind Klamp™**

The Kind Klamp is designed to temporarily stop the flow of urine through the urethra when applying the Men’s Liberty. This simple male incontinence product helps men who are dribbling or leaking and are having trouble applying the Men’s Liberty and Safe n’ Dry devices.

**Features**

- Made from durable engineered plastic and ultra soft foam for added comfort
- Designed to fit small, medium and large anatomy
- No wires or metal ensures that the BioDerm Penile Clamp is skin friendly and can be washed without the potential of rust or corrosion
- Easy use clasp – can be closed and released with one hand!
- Curved upper arm for improved comfort
- Long lasting hinge designed for multiple cycles

**Bed and Leg Bags**

**Features**

- Connects to Men’s Liberty
- Kink-resistant tubing
- Convenient drain spout
- Anti-reflux valve
- All fluid pathways are sterile
- Leg bag straps included

 SKU# 90000

 SKU# 90001
The CathGrip Family

The CathGrip family of universal catheter securement options provides clinicians with the ability to manage a wide variety of catheters and tubes ranging in size from 2-47 Fr. Each product is based on BioDerm's proprietary hydrocolloid with features that solve a wide variety of challenges. When properly applied, these devices provide a comfortable fit and secure hold for up to seven days. The soft straps with no-slip grips are durable for repeat positioning, perfect for continual ease of use. CathGrip is the new standard of care chosen by clinical teams and purchasing departments.

UniGrip™

UniGrip is a truly universal system that securely holds tubes from 2-47 Fr. Available in single or double straps, UniGrip provides all over securement with a skin-friendly hydrocolloid adhesive to prevent skin injuries. Soft straps with no-slip grips are durable for repeat positioning. Sterile and non-sterile available.

Features

- Available in single or dual straps in the large size
- Hydrocolloid adhesive oval
- Hypoallergenic & latex-free
- Soft straps with no-slip grip
- Simple repeat positioning

Uses listed above are not all inclusive. May vary based on tube location, infection prevention protocols and presence of exudating wounds.
PEG Protect™

Designed specifically for use with PEG tubes, PEG Protect brings our skin friendly hydrocolloid securement to long and short term PEG patients.

Features

- Secures both standard and low profile PEG tubes with ease
- Allows for regular tube rotation for traditional and low profile PEG tubes
- Reduces the risk of dislodgement and tube migration
- Provides a skin friendly hydrocolloid barrier against bodily fluid, bruising and excoriation
- Reduces potential for tube kinking
- Two piece design allows for variable securement location related to the PEG tube insertion site

“I love the versatility of the CathGrip line of products. These amazing securement devices allow me to easily position even the most difficult of drains, secure them into place and not have any concerns. Because CathGrip products are made of hydrocolloid and have no hard surfaces, I don’t have to worry about pressure injuries or skin damage. I highly recommend them.”

Diana L. Gallagher

Diana L. Gallagher is a certified wound, ostomy and continence nurse and educator.

SlipGrip™

Designed specifically for use in Interventional Radiology, SlipGrip can help standardize securement and increase patient comfort with skin friendly hydrocolloid.

With a wear time up to seven days, SlipGrip is an excellent choice for inpatient and outpatient tube securement.
HoldMe™

Designed to prevent pressure injuries and skin tearing with low-profile proprietary hydrocolloid securement, especially important when dealing with tender skin.

Low profile oval pairs that are sized for difficult to apply areas. Will hold securely for up to 7 days. Available as sterile or non-sterile.

Grip & Seal™

Grip & Seal extends the security of our hydrocolloid base to support insertion site securement.

Hydrocolloid wings form an occlusive seal that securely holds any tube from 2-47 Fr. and can help reduce dislodgement and minimize the risk of infection. Only available as sterile.

WingSeal™

Designed specifically for use with epidural and nephrostomy tubes, the WingSeal can help standardize your epidural practice and increase patient comfort with skin friendly, low profile hydrocolloid securement. Only available as sterile.
BioPlus+ Barrier Prep Wipe

BioPlus+ improves hydrocolloid adhesion by up to 50%. A BioPlus+ wipe is included in most BioDerm products and is also available as a stand alone product.

Features

- Safe and gentle for all patients
- No sting
- Instantly removes hydrocolloid
- Flash dries in less than 15 seconds
- Reduces skin trauma from tape and dressing removal including infection risk, inflammatory damage and edema
- No harsh chemicals
- Oil and lotion free

FreeDerm Adhesive Remover

Instantly removes hydrocolloid without irritation and evaporates rapidly with no residue. Allows immediate re-application of an adhesive device without washing. Available as 1oz (30mL), 3oz (90mL) pump spray or single use ampoules (1mL).

Features

- Safe and gentle for all patients
- No sting
- Instantly removes hydrocolloid
- Flash dries in less than 15 seconds
- Reduces skin trauma from tape and dressing removal including infection risk, inflammatory damage and edema
- No harsh chemicals
- Oil and lotion free
Now That You Know Our Products

BioDerm provides compassionate solutions for customers around the world. Safer, easy to use and cost effective, our innovative hydrocolloid technology is the next evolution in patient care. Be a part of the future of healthcare technology today!

**OUTPATIENT**
BioDerm’s products are sold through our world-class customer service center, based in Largo, Florida. Our friendly customer service representatives are trained to understand the conditions associated with urinary incontinence and are extremely knowledgeable about all of BioDerm’s products. BioDerm also provides on-site clinical support and a robust quality auditing program to ensure the highest quality service and support.

**ACUTE CARE**
BioDerm’s CathGrip product line is sold through a growing network of specialty distributor and independent representatives targeting acute care, long-term care and other surgical centers. The CathGrip line of products is transforming care in critical care units, interventional radiology, medical/surgical units, wound care clinics and more with solutions that help reduce the incidence of medical device related pressure injuries and catheters becoming dislodged. BioDerm’s urinary management products for acute care are currently sold through BioDerm as Safe n’ Dry outside the United States and by Eloquest Healthcare as ReliaFit and the ReliaFit Kit with CathGrip inside the United States.

**INTERNATIONAL**
BioDerm’s products are currently available for sale in the United Kingdom, Canada, the Netherlands, South Korea, Poland and the United Arab Emirates through a network of independent distribution partners in each country.

**PARTNERSHIPS**
BioDerm’s urinary management products for acute care are currently private labeled and sold by Eloquest Healthcare as ReliaFit and the ReliaFit Kit with CathGrip. Other BioDerm products are available for private label collaboration for target markets and partnerships.
